

Inventorio Pro - User Manual

Welcome to **Inventorio Pro**! This user manual will guide you through the core features of the inventory management dashboard, from checking stock levels to processing point-of-sale (POS) transactions.

1. Dashboard Overview

The **Dashboard** is your command center. It gives you an immediate bird's-eye view of your business operations.

Dashboard Overview

Key Features:

- **Total Products & Revenue Stats:** Quickly see how many unique items you track and your total gross revenue.
 - **Low Stock Alerts:** An actionable table that instantly flags any products that have fallen below their minimum stock threshold, complete with visual gauge meters.
 - **Stock Value Chart:** Visualize your stock's estimated value to keep track of capital tied up in inventory.
-

2. Point of Sale (POS)

The **Point of Sale** system allows you to ring up walk-in customers quickly.

POS System

Processing a Sale:

1. **Search & Filter:** Use the top search bar or the category dropdown to find products instantly.
 2. **Add to Cart:** Click on any product tile on the left grid. A badge will appear on the product showing how many you've added.
 3. **Manage Cart:** In the right-hand panel, adjust quantities using the + and - buttons or remove items entirely.
 4. **Checkout:** Select your payment method (Cash or Card) and click the **Checkout** button. The system will automatically log the transaction and deduct the items from your live inventory.
-

3. Product Management

The **Products** page is where you manage your entire catalog.

Product Management

Managing Your Catalog:

- **Visual Stock Gauges:** Every product has a health bar next to its quantity. Green means healthy stock, yellow means low stock, and red means out of stock.
 - **Adding Items:** Click **Add Product** to create a new item. You can set the name, SKU, price, initial stock, minimum stock requirement, assign a category, and upload a product image.
 - **Editing & Deleting:** Use the action buttons on the right side of the table to update pricing, correct stock counts, or remove discontinued items.
-

4. Transaction History

The **Transactions** page acts as your digital ledger for all processed sales.

Transaction History

Reviewing Sales:

- **Total Revenue:** The top panel shows an aggregate of all recorded sales.
 - **Detailed Ledger:** Every POS checkout creates a permanent record here, detailing the unique Transaction ID, the exact date/time, the items sold, the payment method used, and the total amount.
 - **Searchable Ledger:** Easily retrieve past receipts by searching for a specific Transaction ID.
-

5. Category Organization

Navigate to the **Categories** tab to organize your inventory effectively.

Managing Categories:

- **Custom Colors:** Assign custom colors to categories. These colors will automatically highlight products in the POS grid and tables to help you identify items visually.
- **Product Counting:** See exactly how many products are linked to each category to understand your catalog spread.
